

Job description

Lattimer is a name that people naturally associate with high quality products, products that have the attention to detail required to excel in the exacting world of Glass Container manufacture.

We at Lattimer strive to exceed expectations and are totally committed to our customers and to manufacture and supply products that continue to set the standards in the glass container forming industry.

The Company are looking for Manufacturing Engineers and experienced skilled Setters/Operators for our CNC Milling, CNC Turning and Grinding sections for an immediate start, in our busy Manufacturing Engineering department in Southport, Merseyside, UK.

Your main responsibilities will include:

Health and Safety of yourself and others

Producing high quality components to exacting standards

Setting and operating CNC Milling, Turning or Grinding machines

Reading and understanding engineering drawings

Setting and running parts to planned time.

Continuous Improvement of methods and working practices.

High Housekeeping standards

As well as the above responsibilities the role of Manufacturing Engineer, would include creation of BOM's, processes, programs and fixturing to enable the production department to deliver the orderbook on time, to the required quality standards as well as achieving the correct pricing targets.

Skills Required:

A time served background in milling, turning or grinding.

Must be able to Set and operate CNC machines under minimal supervision

Experienced machinist with a proven capability in setting and operating machinery in a precision engineering environment.

Experience and familiar with Mazatrol, Fanuc, or Heidenhain, CNC control systems would be a distinct advantage.

Must be able to work alone and use their initiative.

Excellent problem-solving skills.

Benefits:

Very competitive pay rates (dependant on ability/experience)

Permanent position

5 weeks holiday plus the normal 8 bank holidays

This is an excellent opportunity for an ambitious, talented individual to join a successful, growing North West engineering business.

- On-site parking
- Day, Night and Weekend Shifts available
- Applicants must be highly skilled individuals with a desire to succeed and should be able to demonstrate a successful track record in their area of expertise.
- Please forward an introduction letter containing your skills, experience and qualifications indicating for which role you wish to be considered together with a comprehensive CV

Job Types: Permanent, Full-time
