

The Quality is in the Detail

Quick Change Blowhead

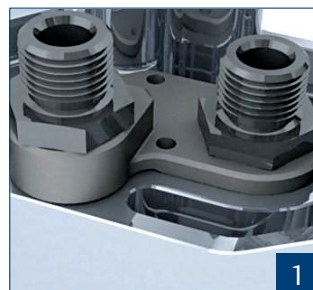

A robust, lightweight Blowhead assembly manufactured from high quality aluminium billet for strength and accuracy. It is equipped with a steel Quick Change adaptor to provide secure clamping and eliminate problematic casting failure.

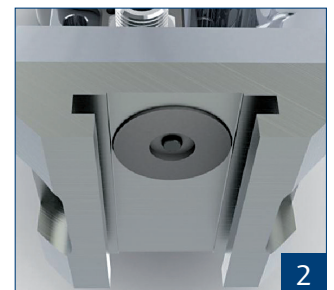

Eliminate costly casting failure

Steel QC adaptor

1

2

- 1 Mounted in steel inserts for strength and security to eliminate torn threads, the air pipe adaptors are positioned close to the point of rotation to reduce drag & inertia.
- 2 The steel QC adaptor utilises a clamping "pad" to provide excellent clamping force between the blowhead arm and the fixed mounting holder. A reduction in stress and fatigue increases service life.

3

- 3 This blowhead helps to reduce cost by using standard lock-rings, although customer specific requirements are available on request. See Technical Bulletin No. 83 for more details.

Benefits

- Improved service life
- Blow & finish cooling
- Reduced drag & inertia
- Positive clamping method
- Eliminate casting failure & torn threads
- Available as SG, DG & TG
