

Chain Driven Take Out Arm - CT Series

A lightweight Chain Takeout Arm, constructed from a strong two piece aluminium casting retaining the key elements of the well proven Lattimer standard Takeout Arm design.

Superior Chain Technology

The use of state of the art silent chain allows for a significant reduction in weight and mass in comparison to tradition chain technology. The premium materials and processes used in their production ensure consistent performance and productivity.

Simple Chain Tensioning

Although minimum tensioning is required, when necessary chain tension is adjusted by means of an eccentric cam method.

Available for most Machine sizes

SG, DG, TG & QD arms

Also available for NIS and other servo driven mechanisms.

Conversion Kits are available to upgrade existing Belt Arms.

Benefits

- Excellent service Life
- Suitable for demanding environments
- Smooth and precise action
- Improved productivity
- Low & ease of maintenance unit
- Available for most machine sizes
