

The Quality is in the Detail

Lightweight Take-Out Assembly - High Performance

Our long established Take-out arm is now complemented with new style tongheads, perfect combination for accurate pick-up and placement of containers time after time.

Spare-part “Kits” are available for all Take-out arms to simplify maintenance and ensure only quality parts are used for extended performance.

Adaptors to fit the Take-out arm to a tonghead are available to fit a wide range of machines and bespoke adaptors are available on request.

Take-out Arm

- Excellent repeatability and positional accuracy
- Low maintenance and high reliability take-out arm
- Smooth high speed action due to low inertia and mass
- Chain driven option (CT series) for challenging environments
- Available for most machine sizes including servo driven units
- Beltarm catalogue available, ask for CAT-TA001

Chain Arm
(CT Series)

Tonghead

- Strong and lightweight, manufactured from a high quality aluminium alloy
- Ease of assembly using a QC fixing to locate onto the take-out arm
- Extended reach Tongheads are available for small ware applications
- Available in SG, DG, TG & QG

Tong Holder

- Lightweight tong holders helping to reduce inertia, allowing highspeed operation of the take-out assembly
- Hardened and ground link pins for extended life and reliable performance
- Anti-Wink action to maintain stability and avoid ware damage
- Conventional action (Non anti-wink) available.

Benefits

- Excellent service life
- Easily maintained
- Strong and robust construction
- Lightweight assembly
- Anti-Wink option
- Available as SG, DG, TG & QG
